1. Bluetooth status

The screenshot shows a terminal window titled 'advos@ubuntu: ~' within a VMware Workstation 16 Player. The terminal output of the command 'sudo service bluetooth status' is as follows:

```
advos@ubuntu:~$ sudo service bluetooth status
[sudo] password for advos:
● bluetooth.service - Bluetooth service
   Loaded: loaded (/lib/systemd/system/bluetooth.service; enabled; vendor preset: Active)
   Active: inactive (dead)
     Docs: man:bluetoothd(8)

lines 1-4/4 (END)
```

2. TCP congestion = reno
